CHEMISTRY 16
EXAM I

Dr. M. Richards-Babb \hspace{2in} July 9, 1998

An optical scoring machine will grade this examination. The machine is not programmed to accept the correct one of two sensed answers and will not sense answers which are lightly marked. Mark your answer sheet carefully with a No. 2 soft lead pencil and erase any undesired marks COMPLETELY. Avoid making any extraneous marks on the answer sheet other than the information requested below.

On the answer sheet:

1. Print your name in the space for NAME (last name first, circle your last name).

2. In the space marked SUBJECT print your student number.

3. In the space marked HOUR print Summer II '98.

Check to see that you have 20 examination questions and a periodic table when the exam begins.

HAND IN ONLY THE ANSWER SHEET.

Useful Equations and Constants:

\[
K_d(H_2O) = 1.86 \text{ kg} \cdot \text{C/mol} \\
K_b(H_2O) = 0.52 \text{ kg} \cdot \text{C/mol} \\
1 \text{ atm} = 760 \text{ torr} = 760 \text{ mm Hg} \\
R = 0.08206 \text{ L-atm/mol-K} = 8.314 \text{ J/mol-K}
