Dr. Peterjohn’s portion of the 2006 final exam

1) Fifteen questions.

2) Some questions (~50%) will cover material presented since the last exam.

   This includes material covered by lecture 16 & 17:
   - Energy flow through ecosystems
   - Biological magnification
   - Productivity (gross & net)
   - Species diversity
   - The niche
   - Competitive exclusion
   - Character displacement
   - Succession

3) Study questions for article 11.

4) Study questions for Chapter 7 in book by Smil.

4) No questions from article 12.

5) The comprehensive questions (~50%) will be on material covered by past exam questions but the questions will not be the same.
