To receive 2% on the final exam, you must: 1) sign up for; 2) attend; and 3) answer questions about the following lecture:

Dr. Christine Goodale  
“Nitrogen Deposition Effects on Carbon Storage”  
Monday March 8, 2010  
4-5 PM  
Room 126 Ming Hsieh Hall

Space for Biol. 221 students is limited to 40 students.  
A sign-up sheet is located outside of Dr. Peterjohn’s office (Room 5214 LSB).

In addition to attending this lecture, you must thoughtfully answer the following seven questions. Your answers are to be typed and e-mailed in to Dr. Peterjohn by Friday March 12, 2010 in order to receive any credit. Trite, or trivial, responses to any of the questions will result in no extra credit being awarded.

1. What are the credentials of the speaker? (You may use the internet to address this question but don’t cut and paste. Use your own words to answer this.).

2. What was the purpose of this talk?

3. What were the main results she found?

4. What were the most convincing pieces of evidence (facts, data, illustrations, etc.) given in support of her arguments, and why did you find them convincing?

5. Of the evidence presented, which did you find to be the least persuasive, and why?

6. If her main conclusions are correct, then what are the important implications of her results?

7. What is the most important new thing you learned from this lecture, and why do you think it is important?
